TITLE

MULTI-LANGUAGE YOUTUBE COMMENT INSIGHT SYSTEM

TEAMMATES NAMES:	ID NUMBERS:
KUNDOOR ANURAG REDDY	2403A54071
NAYINI KALYAN REDDY	2403A54074
PUSALA SATHWIK	2403A54075

Objectives

Main Objective:

To develop a web-based system that analyzes YouTube comments written in multiple languages and provides sentiment insights using NLP techniques.

Specific Objectives:

- To collect YouTube comments in real time using a video Link.
- To detect different languages used in comments (English, Hindi, Telugu, etc.).

Stakeholders

Primary Stakeholders

YouTube Content Creators

- understand audience feedback quickly

Viewers

- improved understanding of community response

Secondary Stakeholders

- Digital Marketing Analysts
- Social Media Researchers

Problem Being Addressed

- YouTube comments are written in mixed languages.
- Manual analysis of thousands of comments is difficult.
- No simple system exists to automatically analyze allour multilingual audience sentiment.

Programming Languages, Tools, and Software

Python

HTML, /CSS3
(IT STREAMLIT FRAMEWORK)

NLP Libraries

- NLTK / spaCy
- Scikit-learn
- YouTube Data API
  (for comment extraction)

Language Detection

- langdetect library

COSS

GitHub

Front-End View of Proposed Web Application

Proposed Interface (Concept Design):

- **User Interface Flow:**
  - Inputficid to paste YouTube Video URL.
  - **"Analyze Comments"** bution
- **Output Dachboard displaying:**
  - **Total comments analyzed**
  - Language distribution chart
  - Sentiment analysis pio chart
  - Positive Negative. Neutral perceentages.

The uiser uniers ar Foutube video hils, anid the system automaticctuly analyees multingual comments.

THANK YOU
